
Why Choose A Registered &

The Registered & Licensed Dietitian (RD/LD) is **the nutrition expert** because she/he has the most rigorous and concentrated education and training in nutrition of any health care practitioner. The principles of nutrition are those based in human biochemistry & physiology, and food, behavioral and social sciences. The RD/LD has at least a baccalaureate degree in nutrition/dietetics from an accredited US college or university, has completed a supervised 6-12 month dietetic internship program, and has passed a nationwide credentialing exam.

Credentialing protects the public from being harmed by unqualified and incompetent practitioners. **Licensed Dietitians are the only nutritionists licensed and credentialed by the state of Texas.**

The RD/LD follows a professional code of ethics that places a high value on providing services based on scientific principles. Linda provides **Medical Nutrition Therapy** which incorporates nutrition assessment, personalized interventions and monitoring for the prevention of disease. Linda can separate facts from fads and translate the latest scientific findings into easy-to-understand nutrition programs. Linda is your trusted authority for cost effective, personalized, and preventive medical nutrition therapy.
